Protect your documents from drafting errors – and speed up the review process.

Even the slightest drafting mistake can have unintended – and sometimes disastrous – consequences. Prevent those mistakes and save hours with Drafting Assistant – Transactional, the review and analysis software tool from Thomson Reuters.

Your “second set of eyes”
Drafting Assistant – Transactional works within your word processor to intelligently scan your documents in seconds, alerting you to errors, inconsistencies, missing information and more.

Avoid unintended drafting errors and reduce risk
Rapidly identify and assess potential issues, such as defined term and cross-reference discrepancies and missing information. So you can be sure the document accurately reflects your intended meaning – and your best work.

Shave hours off the painstaking review process
Instantly locate and resolve drafting issues, both within your document and in related documents referenced by your master document. That means less time finding errors and more time fixing them.

For more information go to store.westlaw.com/drafting-assistant-transactional or call 1-800-762-5272.
All the tools you need to draft and review – right in your word processor.

1. **Analyze.** Instantly identify and correct open issues, inconsistencies, and more.
2. **Flags.** Jump right to potential drafting mistakes with a few clicks.
3. **Reports.** Create custom reports of flagged issues.

4. **Outline.** Easily navigate within your document and toggle between related sections.
5. **References.** Confirm that cross-references, citations, and definitions within your document and to other sources are correct.
6. **Templates & Sample Documents.** Jump-start the process with hundreds of precedent documents and clauses.
7. **WestlawNext® and Westlaw®.** Search for additional forms, checklists or other information without leaving your document.
